

TALK · LIVE DEMOS

AI in the hands of cybercriminals

How to survive it, with Dominic Villeneuve

Duration

60 to 90 minutes

adjustable to the group

Format

On-site

or remote

Audience

Managers and employees

no technical background needed

THE GOAL

AI doesn't change what hackers want. It changes how fast they get it.

Through demonstrations, discover how generative AI and autonomous agents make attacks more convincing, and how to use these tools safely in your organization.

AGENDA

See, understand, anticipate

See

Live demos

See the risks before explaining them

What AI changes

Personalization, voices, fake profiles

Understand

Generative or agentic

Two AIs, two kinds of risk

Agents out of control

A real case, step by step

Anticipate

Your weak spots

Mapping everyday risks

Using AI safely

The bulletin board test

Set the rules

An AI acceptable use policy

Live demonstrations that leave a lasting impression.

FOR ORGANIZATIONS ADOPTING AI

Leadership

Managers

All employees

IT

Compliance

Content adaptable to your industry and audience. Custom version available on request.
