

INTERACTIVE SIMULATION

When hackers walk through the door you left open

A cyberattack simulation, from attack to recovery, with Dominic Villeneuve

Duration

2 hours

adjustable to the group

Format

On-site

or remote

Audience

Leadership teams and managers

no technical background needed

THE GOAL

Cybersecurity is a series of management decisions.

Your leadership team lives through a full ransomware attack, from the first click to business recovery, and leaves knowing what to do, in what order, and who does what.

HOW THE SESSION UNFOLDS

From first click to recovery

The attack		The response			The recovery	
The first click	The escalation	First steps	Who to call	Communicate	Clean up and restore	Commit
How hackers get in	Preventing it, and who is involved	Contain, mobilize, investigate	Insurer, DFIR, legal, police, privacy regulator	Ready-to-adapt templates	Eradicate, harden, no relapse	One action per person, one checklist

A live simulator: your leadership team becomes the crisis unit.

FOR THE WHOLE LEADERSHIP TEAM

Executive management
