

TALK

Cybersecurity in 2026: how to survive it

AI, today's top frauds and the right reflexes, with Dominic Villeneuve

Duration

60 to 90 minutes

adjustable to the group

Format

On-site

or remote

Audience

All employees

no technical background needed

THE GOAL

Hackers don't target your systems. They target your people.

A practical overview of today's threats, from artificial intelligence to the most common frauds, with demonstrations and simple steps to protect the organization, and your home.

AGENDA

Understand, recognize, protect

Understand

AI, ally and threat

Generative, agentic, risks

Who the hackers are

Groups, states, insider threats

Recognize

How they operate

Emails, fake sites, passwords

Today's top 5 frauds

Deepfakes, smishing, vishing and more

Protect yourself

The right reflexes

Passwords, MFA, devices

On the road

Public WiFi and hotspots

Quebec's Law 25

The key points

Live demonstrations: see the attacks before we explain them.

FOR THE WHOLE ORGANIZATION

All employees

Managers

Customer service

Administrative teams

IT

Content adaptable to your industry and audience. Custom version available on request.
